Regarding claims 11 and 33 the prior art does show at least a voltage source adapted to output a multi-phase voltage signal and in electrical communication with said traveling wave grid and said first and second electrodes of said gate. Regarding claim 23 the prior art does not show at least said controller outputting an electrical signal having first and second phases, and applying said first phase to said first electrode of said gate and applying said second phase to said second electrode of said gate.
